

# CASE STUDY

## BRIGHTENING MPR SUPPLY'S WAREHOUSE

### ABOUT US

We assess your current lighting situation to show you how it can be improved. We're experts at evaluating a given space, from large manufacturing plants to office buildings, providing recommendations that will work best for your goals and budget.

### “THANKS TO STL LED,

my employees no longer struggle with the lighting quality in our warehouse. They no longer complain about the lighting, and I no longer worry about the effects it had on their well-being and productivity. The difference is night and day, and everyone is back to focusing on their daily operations.”

– Mike Hartman, Owner,  
MPR Supply

### PROBLEM

MPR Supply needed assistance with its dimly-lit warehouse. The combination of fluorescent and incandescent bulbs used in the space were inefficient and ineffective. Certain areas of the warehouse were so poorly lit, employees needed flashlights to complete their jobs. As a major supplier of landscaping materials, MPR Supply's leadership knew that a significant improvement was needed to optimize their daily operations.

### SOLUTION

STL LED created a custom retro-fit approach that allowed MPR Supply to increase the light in areas where it was needed while maintaining light levels in areas where additional light was not necessary. To accomplish this goal, the STL LED team conducted a thorough analysis of the space, collaborated with MPR Supply leadership to determine how better light supported their business goals, and customized the amount of light that each retrofit emitted. This strategy allowed MPR Supply to improve the quality of the light necessary to complete its business objectives without overpaying for superfluous light in underutilized areas. Without replacing a single fixture, MPR Supply received the lighting needed for its warehouse for the best possible price.

### RESULT

With the help of STL LED, MPR Supply lowered its monthly utility bill, improved the productivity of its employees, and showcased its impressive warehouse. As STL LED is an Ameren Trade Ally Parter, MPR Supply further increased its ROI by taking advantage of premium access to Ameren Cash Incentives. Employees no longer need flashlights to complete their jobs and the executive team couldn't be happier with the effect it's had on their bottom line.
